Developer

I graduated in Computer Engineering from the University of La Laguna (Tenerife - Spain). I have focused my training in Information Technology, which has provided to me knowledge related with web and mobile development, security and data processing.

I consider myself a hard worker person, active and dynamic. Be aware of the goals of the project I work for is important for me. It is helpful for me to be focused and work hard. I think the most important for a developer is learning because this business is continuously advancing and it is the best way to get the best results, be useful, and innovate. I love work as part of a team, learn and contribute, study, and negotiate alternatives.

Professional experience

25/09/2015 - 20/03/2018	**Researching, development and innovation (R&D+i)** *ATOS* I worked for R&D+i department in a project related with security and privacy. I was developing an Android app for ABC4EU project. I developed and led a small team for the implementation of a mobile application on Android for the project ABC4EU(http://abc4eu.com/).
23/02/2015 - 07/05/2015	**Web developer** *INTEGRA Tecnología y Comunicación de Canarias, SL* I collaborated in different projects in the development department. Mainly I dedicated to the development of applications and web design. I used tools like Laravel, Joomla and got experience in Scrum methodology.
01/10/2013 - 30/06/2015	**Systems technician / Intern** *University of La Laguna* Maintenance tasks: installation and configuration of software and OS, cloning, cleaning, security, scripts, etc. I worked with desktops and other multimedia devices.
04/2007 - 06/2007	**Systems technician / Practices** *Chamber of Commerce of Santa Cruz de Tenerife*

Installation, administration and configuration of equipment and development of improvements in the systems of the company. Management and maintenance of computer packages of general and specific purpose used in the company.

Education

10/09/2012 - 22/09/2015	**Graduated in Computer Engineering** *University of La Laguna* Itinerary: Information Technologies: Web systems and technologies, IT and knowledge management of organizations, security and networks.
09/2005 - 07/2007	**Computer Systems Technician** *IES Cesar Manrique* Deploy and manage computer systems, network management, software installation and changes to improve system and application exploitation.

Professional skills

My favorites languages are Android (Kotlin and Java) and Ruby, but also I have worked with PHP, Java, React and Swift. Currently, I want to improve my skills in the front side, so learn angular is my next challenge. I also have experience with other software development tools like Git, Docker, Jira, Swagger, etc. And talking about languages, I have experience with the English language, too!

If I have time during the sprint, I use my time in the development and integration of tests to get a robust application. I usually focus on unit tests and user interfaces like instrumented tests (Android) or Selenium (web).
